

Facilities

Our UK premises are fully flexible to best suit our customers' requirements whether for production or equipment services. Current testing capabilities include 7 test beds, and on-site Electro Magnetic Compatability (EMC) testing. Test beds feature electrical load banks, a water brake dynamometer and a simulated sea water cooling facility.

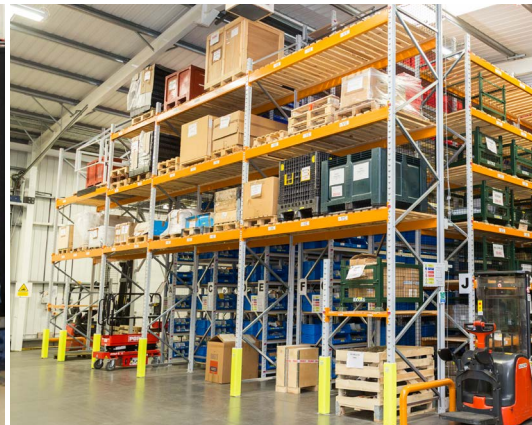

Generator units in outer storage area

24kW Generator on Test

6.5kW Variable Speed Generator on Test

Storage area

Spray booth

Site summary:

- Approx. 5000m² overall.
