

Health Safety and Environment Management System Scope

The scope of the health safety and environmental management system applies to the activities, products and services of Rolls-Royce plc. Specifically, the system applies to the management of environmental aspects, occupational health and safety¹ risks and opportunities, compliance obligations in the design, manufacture and service of its products and its related business activities.

Geographic coverage of the system applies globally and covers the people working under the direct supervision of Rolls-Royce.

The system boundaries encompass our locations and off-site activities under the direct control or influence of the Company. The boundaries extend to the interface with third-parties² working on our behalf.
